The Absolutely Pure BAKING-POWDER

is the baking powder of general use, its sale exceeding that of all other baking powders combined.

Royal Baking Powder has not its counterpart at home or abroad. Its qualities, which make the bread more healthful and the cake of finer appearance and flavor, are peculiar to itself and are not constituent in other leavening agents.

Great efforts are made to sell alum baking powder under the idea that they are no more than a pound cheaper than Royal. The admission that they are cheaper is an admission that they are inferior. But alum powder contains a corrosive poison and should not be used in food, no matter how cheap.
